Why do I want to take three more years as Health and Safety representative?

Because the working environment at a workplace is very important among the employees. I would like to assist in, so we can be one unit, despite of nationality and different cultures. I would also like to help people that only speak their mother tongue, so they get the correct help to learn Danish or English. They must, of course, have been employed for a longer period, but we should help them, as many feel alone with their problem.

This is what I would like to assist in.

Best regards
